FIELD DAY SPECIAL JUNE 2019 — Volume 79, Issue 6

JOINT SPRC — MINING CLUB FIELD DAY JUNE 21, 22, 23, 2019.

Friday Late Afternoon into Early Evening: Set-Up

Saturday 1:00 PM Operation Begins

Sunday 1:00 PM Operation Ceases, Tear Down, and Clean Up

This year the location will be Benson's Airport 5860 Hwy 61 N White Bear Lake MN. It is located under the big water tower in White Bear Township just east of highway 61. The FAA Identifier is 6MN9. Anyone who would like to fly in and camp under your wing during Field Day may do so. Just bring your own set of tie-downs and we will find a nice patch of grass for you. 2000x75' turf runway. Unicom is 122.7.

We met at the new site for a planning meetup on June 1st and I think the preliminary game plan is in good shape. This year we will be running as a 3A station. There will be a station running the non-CW digital modes. We will still have CW and SSB. There will be a VHF station and I would like to challenge anyone Technician and above to try to make at least 1 contact. The GOTA station will be front and center as well.

We are still in need of someone to be the chairperson for the SSB station. You don't need to have done anything like this in the past, just the willingness to learn as you go. We have a co-chair who will help out as much as he can with his schedule conflicts. There will be a bunch of helpers for setting up the gear where you need it. The biggest thing is to set up the schedule for operators so that we have coverage for as much of the 24 hours as possible. Please email me if you are considering this or have questions. kd0sqj@arrl.net

We've got about two weeks to go and I think this will be a fun location and am looking ahead to another stellar event. If we can get a lot of you fine folks helping out just a little bit when you can it makes it fun and more enjoyable for everyone involved.

We will not have anything like the giant banquet that some past Field Days have had, but should have some tasty grill type items to keep us worker bees going. There will be a sheltered building we will have access to in case of the sideways rain we sometimes get. If it gets really hot and you MUST go to the Cup and Cone make sure to pick up a medium butterscotch shake for me.

GOTA and VHF will be in tents. SSB and CW will be in RV's and the Digital station will be inside a travel trailer. We should have comfortable operating positions for all the stations. The sign-up schedules should be starting soon and I will keep you posted.
